PROFESSIONAL SUMMARY

Automation and AI systems specialist with a BS in Applied Mathematics (Cum Laude) and hands-on experience building end-to-end workflow automations for B2B, real estate, mortgage, and e-commerce clients. Designs and deploys integrations across Make.com, GoHighLevel, ClickUp, Zapier, and Shopify, combining REST API and webhook engineering with AI-driven data parsing, lead qualification, and document generation. Strong foundation in Python, R, and statistical modeling, with proven results eliminating manual data entry, protecting margins, and cutting response times.

TECHNICAL SKILLS

Automation and Integration: Make.com (Integromat), Zapier, n8n-style workflow design, REST APIs, Custom Webhooks, JSON parsing, API authentication and error handling

CRM and Platforms: GoHighLevel (GHL), ClickUp API, Shopify, QuickBooks API, Facebook Lead Ads API, Google Workspace, Twilio, Slack, Asana

AI and NLP: OpenAI / GPT API, Claude, prompt engineering, AI data extraction and parsing, conversational AI agents, Structural Topic Modeling, text analysis

Programming and Data: Python, R, JavaScript (ES6+), React.js, Vite, HTML5, Git and GitHub, advanced Excel and Google Sheets, statistical modeling, data visualization

Compliance and Operations: A2P 10DLC registration, SMS and email deliverability, SOP documentation, pipeline architecture, project management

PROFESSIONAL EXPERIENCE

API and Automation Specialist

2025 – Present

Level 9 Virtual | Remote

- Rebuilt a broken real estate IDX-to-CRM integration that had stalled for 4.5 months, replacing an unreliable Zapier connection with a Make.com mailhook and AI parser that creates fully populated GoHighLevel contacts and pipeline opportunities in real time.
- Delivered end-to-end digital builds including high-converting GoHighLevel sales funnels and customized Shopify storefronts, and integrated AI agents that reduced customer response times.
- Secured A2P 10DLC carrier approval for multiple client accounts by auditing EIN and legal entity data, drafting compliant SMS consent and privacy language, and deploying temporary compliance landing pages to unblock stalled SMS campaigns.

Marketing Automation Specialist

2025 - Present

Stone Depot | Davao City

- Developed and implemented 15+ marketing automations that streamlined lead generation and routed Facebook and website inquiries directly into ClickUp, saving hours of manual work weekly.
- Built an interactive React and Vite slab and material calculator that converted a manual, spreadsheet-based quoting process into an instant, mobile-responsive estimating tool with built-in input validation.
- Created and managed a two-month content calendar producing consistent campaign content that strengthened the brand's online presence and improved campaign efficiency.
- Architected a B2B partner lifecycle system enforcing program compliance, AI-based territory assignment, and monthly monitoring of a PHP 1,000,000 annual purchase threshold, integrating ClickUp and QuickBooks APIs for automated renewal and revocation decisions.
- Engineered complex automation ecosystems and custom API integrations in Make.com, connecting client platforms end to end and eliminating manual data-entry bottlenecks across sales, HR, and finance workflows.
- Built an omnichannel lead ingestion engine capturing leads from Facebook Lead Ads, website forms, and email; used AI parsing to extract structured data, filter bot submissions, normalize phone numbers to +63 format, and auto-route prospects to five regional branches in ClickUp.

Automations Specialist (Project-Based)	2025
<i>Remote Lender LLC Remote</i>	
- Developed and deployed custom GPT solutions and AI-driven automation projects using Make.com to integrate ClickUp, Google Workspace, and CRM platforms. - Designed intelligent task routing, automated reporting, and knowledge management systems that significantly reduced manual effort and improved operational efficiency. - Collaborated with stakeholders to customize AI models for business needs while maintaining centralized documentation and monitoring automation pipeline performance.	

Administrative Assistant Intern	2024
<i>Department of Science and Technology (DOST) Davao City</i>	
- Enhanced the Customer Satisfaction Feedback (CSF) system by developing Excel-based summary files that automated calculation of Net Promoter Scores, satisfaction ratings, and customer demographics for training and quarterly reports. - Applied advanced Excel functions to streamline data processing and maintained organized datasets on shared drives. - Updated the consultancy tracker with evaluation data from over 50 firms, improving reporting accuracy and turnaround.	

Social Media Manager and Video Editor	2021 – 2023
<i>Remote Lender LLC Remote</i>	
- Produced and published 200+ pieces of social media content, including Instagram Reels and YouTube videos, generating more than 2 million total engagements across both platforms over three years. - Managed the full content pipeline from concept and scripting through editing, scheduling, and performance review.	

SELECTED PROJECTS

AI-Driven Mortgage Operating System, GoHighLevel	2026
- Architected a complete CRM operating system for a mortgage lending firm with four logic-driven pipelines covering borrowers, refinance alerts, loan officer recruiting, and realtor recruiting. - Configured an AI conversational bot to qualify inbound leads by loan type and escalate high-intent leads to the internal team via Slack, and connected external mortgage platforms through Make.com webhooks for hands-free pipeline updates.	

Automated HR Disciplinary Workflow and Document Generator	2026
Built a Make.com and ClickUp API workflow that generates Notice to Explain documents automatically from logged incident data, mapping policy codes, labor codes, and suggested disciplinary actions into a compliant template and outputting final document URLs.	

Policy Data Analytics and Visualization Lead, Academic Research	2024 – 2025
- Developed an interactive web platform analyzing and visualizing 13,000+ local ordinances from 22 cities using Structural Topic Modeling and other NLP techniques. - Designed dashboards revealing patterns in governance and digital service delivery, translating unstructured text into actionable insights for data-informed policymaking.	

EDUCATION

University of the Philippines Mindanao	2021 – 2025
Bachelor of Science in Applied Mathematics, Cum Laude	
Ateneo de Davao University	2019 – 2021
Senior High School, With Honors	

LEADERSHIP AND ACTIVITIES

Finance Officer, UP Mindanao YouthMappers	2024 – 2025
Partnerships Head, UP Mindanao AMPLI	2024 – 2025
